

This is an exciting time to be a resident of the City of Warwick. Never in its 360 years of existence has it seen such unprecedented growth, opportunity, and change. With this in mind, we have compiled a variety of resource pages to assist you in learning more about the major issues which are playing a role in the future of our great city. Upon evaluating these topics, take the time to contact your elected officials so that you may offer insight as to how your government should proceed.

- [T.F. Green Airport](#) - Perhaps the most intense point of contention within the City of Warwick is the dramatic rise of this facility.
- [Greenwich Bay Initiative](#) - Greenwich Bay is an estuary—a semi-enclosed inlet of the sea in which seawater is diluted with fresh water. It contains five protected coves with five square miles of shallow water and is embraced by a 26-square-mile watershed. Greenwich Bay is a highly productive estuary that has provided people with food, shelter, transportation, trade, and recreational opportunities for centuries. However, the impacts of land uses in bordering Warwick and East Greenwich, and, to a smaller degree, West Warwick, have led to a serious water quality decline in the bay.
- [Education in Warwick](#) - The education of the children of Warwick is of paramount importance to the Warwick City Council. Discover the wide array of schools and services in and around our city.
- Rocky Point - Once considered a New England treasure, and now laying in a state of decay, this area of Warwick has been a focal point for the SBA, potential developers, and concerned residents who wish to return Rocky Point to the splendor of yesteryear. Click here to learn more about the major players, view some current photos, and learn more about the history of this historical landmark. (COMING SOON)
